

NATIONWIDE MANUFACTURING & DISTRIBUTION

RACK BACK FRAMED STYLE

INDUSTRIAL HEAVY DUTY SOLUTION TO RACK SAFETY

As a premier manufacturer of wire and steel products for the material handling industry. ITC Manufacturing is committed to delivering high value to its clients on a continuous basis.

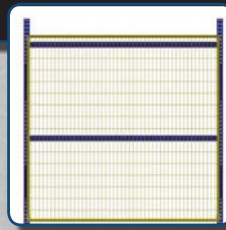

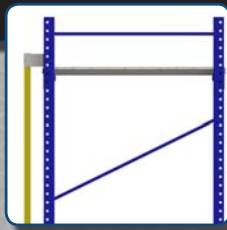

ITC Framed Style Rack Back is made of 2" x 4" x 8 gauge steel welded wire mesh, welded into a steel angle frame. Panels have predrilled mounting holes on six-inch centers and are provided with a flush mount or offset brackets to allow for pallets that overhang the beams.

SPECIFICATIONS:

- Pre-punched holes for easy bolt on assembly.
- Standard sized panels 4'-0" high, match beam length.
- Custom size panels available.
- Panels made of 2" x 4" x 8 gauge welded wire mesh.
- Pallet Rack Backing Panels attach directly to rack with mounting brackets.
- Offset brackets allow for load to overhang rack beams.
- Stack pallet rack back panels one on top of the other to reach desired height.
- Angle frame design gives installer clear access to hardware, speeding installation.
- Pallet Rack Backing System may be started at the floor or at any level where protection is required.
- Pallet rack backing panels can be mounted to support posts-if stand alone system desired.
- Heavier options available.

FINISH:

- Powder Coat Grey

ITC Manufactures and Distributes out of both the Phoenix, Arizona and Columbus, Ohio locations.
